

SwiftyNote Consent Form

Re: Consent to Use SwiftyNote's AI Scribe during your visit

Dear Patient,

Our practice is committed to providing the best possible care for you, and as part of this commitment, we are always looking for ways to improve and enhance our services

We're excited to introduce you to SwiftyNote. SwiftyNote has an AI Scribe tool that helps us generate clinical notes based on our conversation during your visit. This friendly assistant enhances accuracy and efficiency, allowing us to focus more time on your care.

What is SwiftyNote's AI Scribe?

SwiftyNote's AI Scribe is a tool that captures the conversation during a medical visit and creates a written summary based on that interaction. This summary is then reviewed and approved by your doctor.

How will this affect you?

SwiftyNote's tool does not interact with you directly. It simply listens to the conversation and generates a summary. This helps the doctor concentrate more on your care and less on note-taking.

Data Privacy and Confidentiality

We want to emphasize that your privacy is our top priority. The AI tool strictly follows the guidelines of the Health Insurance Portability and Accountability Act (HIPAA) to ensure the security and protection of your data. Access to these notes is limited to the healthcare professionals directly involved in your care.

I, _____, consent to the use of SwiftyNote's AI Scribe during my medical encounters/appointments.

I understand that my privacy and confidentiality are priorities, and I trust that appropriate measures are in place to protect my healthcare information.

Patient's Signature: _____
